

Accelerating Enterprise Growth with AI and Security Excellence

Crest Data is a data and **AI-first** product engineering and technology solutions provider with deep expertise in Agentic/Gen AI, Cybersecurity, Observability, Data Analytics, Workflow Automation, and Cloud, accelerating businesses with their digital evolution. With over 150 global customers, we have delivered integrations, products, and solutions that combine AI-enabled engineering with intelligent automation. Crest Data enables businesses to engineer intelligence and modernize ecosystems in the AI era.

What We Deliver

Security

- Implement SIEM, SOAR, and Endpoint Security
- IAM, DLP, SASE Security
- Endpoint Detection and Response
- Security Integrations and Security Migrations
- 24x7 Managed SOC

AI / GenAI / ML

- Agentic AI
- Interactive Chatbots and Conversational AI
- Enterprise Workflow Automation
- Retrieval-Augmented Generation (RAG)
- Data Labeling

Observability

- Infrastructure and Network Performance Monitoring
- Application Performance Monitoring (APM)
- Real User Monitoring (RUM) and Synthetic
- Monitoring Container & Kubernetes Observability
- Incident Detection, Alerting, and AIOps

Data Analytics

- Data Ingestion & Pipeline Engineering Search,
- Querying & Dashboards
- Log Analytics & Log Management Operational & IT Analytics
- Machine Learning & Anomaly Detection

Site Reliability Support / CloudOps

- Reliability Architecture & System Design
- Incident Management & On-Call Operations
- Monitoring, Observability, and Telemetry
- Automation & Tooling
- Change Management & Release Reliability
- Cloud Cost Optimization & Efficiency

DevOps

- CI/CD Pipeline Design & Automation
- Configuration Management
- Infrastructure as Code (IaC)
- Cloud Architecture & Management
- Automation & Scripting
- Security Integration (DevSecOps)

Our Journey

150+

Global Clientele

5,000+

Project Delivered

60%

Cost Savings

1,200+

Smart Workforce

Why Crest Data

Because innovation thrives with the right engineering partner.

- **Design, build, and operationalize** exceptional products, solutions, and marketplace ecosystems for global enterprises and the most innovative start-ups
- **AI-first approach** to product engineering, combining deep engineering DNA with AI to build intelligent, scalable, and secure solutions
- **Strategic technology partnerships** combining strong alliances with AWS, Google, Microsoft, Cisco, ServiceNow, Datadog, Dynatrace, and other Tier-1 technology leaders
- **Accelerated Migrations & Integrations** with AI-driven automation, enabling up to 60% reduction in migration time
- Develop **Marketplace Integrations** at scale with our broad industry experience that are running successfully on global digital platforms
- **Outcome-based delivery** aligned with the business-aligned to keep the customer ahead of their competition
