

Accelerate **AI-driven** Observability and Security on Datadog.

Crest Data, an Advanced Datadog partner, delivers specialized, enterprise-grade observability and security services with unified visibility across complex hybrid and multi-cloud environments — so teams detect, prioritize, and resolve production incidents and security threats faster, while tuning performance and optimizing costs.

Why Crest Data? **ADVANCED DATADOG PARTNER**

-  **#1 on the Datadog Marketplace** with 81+ live integrations published.
-  **100+ enterprise implementations** delivered worldwide across regulated industries.
-  **Certified Datadog specialists** across observability, security & cloud domains.
-  **5,000+ ecosystem integrations** built across SIEM, SaaS & infrastructure platforms.
-  **AI-driven migration engine** — up to 60% faster delivery for dashboards & alerts.
-  **Fully-managed services** — 24x7 SRE, SOC and L1/L2 support coverage.

Our Datadog Offerings **IMPLEMENT · MIGRATE · INTEGRATE · MANAGE**

Implementations

01

- End-to-end rollouts across AI, observability, security, digital experience, software delivery & ITSM.
- Observability-as-code setup for scalable, standardized monitoring.
- Production-ready launches with cost and performance optimization built-in.

Migrations

02

- Up to **90% automation** of dashboards and alert migrations to Datadog.
- Multi-platform expertise across leading observability platforms.
- Structured, phased migration approach to minimize risk and downtime.

Integrations

03

- Custom integrations across security, SaaS and infrastructure platforms.
- AI agents, MCP servers, dashboards and alert development.
- Workflow and AppBuilder automation to operationalize new data.

Managed Services

04

- 24x7 SRE, SOC and L1/L2 operational support.
- Continuous cost and performance optimization.
- Fully-managed observability and security services.

“We're excited to welcome Crest Data to the Datadog Marketplace! Monitoring Dell EMC Isilon storage with new metrics and dashboards will help network engineers alert on and troubleshoot issues with data storage and access. By providing new integrations for Datadog customers, Crest Data will be a valuable addition to our partner ecosystem.”

Michael Gerstenhaber

Sr. Director of Product Management, Datadog

SUCCESS STORY · ENTERPRISE DATABASE OBSERVABILITY

Scaling Enterprise Sybase Monitoring through Datadog Integration

Centralized monitoring for 20+ business-critical Sybase ASE databases inside Datadog eliminated fragmented visibility and established a scalable, standardized observability framework — improving incident response, strengthening governance, and reducing operational overhead across the estate.

[Explore more success stories →](#)

20+

Sybase ASE databases consolidated into a single Datadog pane of glass.

↓
MTTR

Faster incident response with unified metrics, logs and alert routing.

↑
Gov.

Stronger governance & lower operational overhead from standardized monitoring.

COMPLIMENTARY ENGAGEMENT

Get Your Datadog Migration Assessment.

A no-cost, hands-on review of your current observability footprint with a tailored migration plan and ROI estimate — delivered in days, not weeks.
