Years' experience

Why Crest Data?

-  **Proven track record** delivering enterprise integrations at scale.
-  **Deep security domain expertise** across SIEM & SOAR workflow architecture.
-  **High-performance data normalization** across inconsistent formats & analytics.
-  **Future-ready modernization** from legacy on-prem to cloud-native & DevOps.
-  **End-to-end managed services** — reducing administrative costs by up to 60%.
-  **Full-lifecycle ownership** — from PRD to QA, certification & 24x7 support.

Our Core Services **SECURITY · OBSERVABILITY · ANALYTICS · CLOUD · ITOPS**

Security Tools & Platform Integration

01

- Consolidate & modernize SIEM, SOAR and EDR ecosystems with AI-powered automation.
- Expertise across Google SecOps, Splunk, IBM QRadar, ArcSight & ServiceNow SecOps.

Observability Integrations

02

- Unify logs, telemetry, devices, APIs & apps for full-stack visibility with no blind spots.
- Datadog, Dynatrace, Amazon CloudWatch & Grafana — achieve SLOs, reduce MTTR.

Data Analytics Integrations

03

- Normalize raw data from syslog, APIs & custom scripts into a uniform foundation.
- Correlate disconnected sources into insights with strategic business value.

Cloud & DevOps Tool Integrations

04

- Modernize legacy apps with microservices, modern databases & UIs (ReactJS, AngularJS).
- Robust CI/CD pipelines across Docker, Kubernetes & Jenkins.

AIOps & ITOps Integrations

05

- Unify infrastructure, enterprise apps, DevOps & cloud for seamless IT monitoring with scalable, multi-vendor architecture.
- Integrations across Datadog, AWS, Dynatrace, ServiceNow, Chef, Puppet, Ansible & Kubernetes.

INTEGRATION EXPERIENCE

A marketplace built across every critical enterprise domain.

From use-case design
to certified, supported delivery

SECURITY

Splunk, CrowdStrike, Palo Alto Networks, Microsoft, Google SecOps, ServiceNow SecOps, AWS Security Hub, Elastic & 100+ more

OBSERVABILITY

Datadog, Dynatrace, AWS CloudWatch, New Relic, Splunk Observability, Cisco AppDynamics, Grafana & 20+ more

AI

AWS Bedrock, Amazon SageMaker, Claude, OpenAI, Gemini & several others

SUCCESS STORY · AGENTIC AI FOR SECURITY OPERATIONS

AI Assistant connecting SIEM & ITSM at a global financial institution

Analysts were spending half their time on routine SIEM queries, with a widening knowledge gap between junior and senior staff. Crest Data delivered an MCP-based AI Assistant providing a natural-language interface to SIEM and ITSM — with OAuth 2.0 authentication, containerized deployment and comprehensive audit logging — so analysts query data and update tickets in plain language while preserving security posture.

[Explore more case studies →](#)

↓
50%

Routine query time reduced with a natural-language interface to SIEM.

Faster

Security incident investigation across the SOC.

Higher

Analyst productivity sustained while preserving compliance & governance.

LET'S BUILD TOGETHER

Talk to an integrations expert.

Connect with our team to scope your integration roadmap — from security and observability to cloud, DevOps and AI Ops — and build a scalable, future-ready integration marketplace.
